

COMPANY PROFILE

MedSurge (MedSurgeTek Inc.) is a technology company focused on healthcare, composed of people with hospital experience, clinical background, and technology expertise and experience... thus giving us the advantage as we are aligned with the hospital culture and environment. With our footprint in supplying combining technology products in medical, surgical, healthcare Engineering & IT areas to different medical centers in the country and as a marketing innovation arm in the SEA region.

Our core team has more than 80 years of combined experience in healthcare facilities locally and in the USA. Our technology team is exposed to the best practices and standards in healthcare.

We also solidified our Healthcare IT & Informatics portfolio with the stronger technology & technical core team by offering Information and Communication Technology (ICT) software and hardware, Vital iPrograms (VIP) Plus products & services towards digital transformation.

With our holistic approach, from Clinical communication, Interoperability, Data Security, EHR/EMR Optimization, Telehealth, Data Analytics, Patient engagement, Predictive medicine, AI etc., we witness and feel every beat of digital transformations proving that our mission of providing “combining technology solutions” are now part of healthcare institutions that provides them operational productivity and a business strategy.

MedSurge started operation in September of 2013, we pioneered in

1. Implementation of a full IP Based Nurse call system project in the Philippines. In early 2014, in a series of projects we managed to include a Clinical Workflow Solutions that complemented & integrated the nurse call system for nurse rounding. This IP based system can be integrated with EMR and infotainment systems.
2. Use of WiFi Phones by nurses integrated into the nurse call system. With a full-IP nurse call platform we integrated a VOIP in 2016 for voice communication between WiFi phones- nurse station to Voice in Ensuite/toilet communication for patient safety & experience.
3. Real-Time critical environment monitoring (Temp., RH, ACH & Pressure) in the Operating room with customized integration software to the building management system (BMS).
4. Implemented the first Secure clinical & team collaboration mobile application platform in the country. This serves as the official clinical communication of doctors, nurses, and hospital staff. This mobile communication is integrated with EMR.
5. Providing instrumentations & redefine retraction in surgery to innovative General Surgery, Laparoscopic procedures, Lap Robotics & Bariatric approach/technique in surgery in major medical centers in the country and in SEA region.
6. As a healthcare technology company, we have Vital iPrograms (ViP+) and Services that handle Service Management including users training in clinical nursing informatics, healthcare ICT, Biomedical service standards and guidelines aiming best practices.
7. In 2020 (before pandemic). We started POC's (Proof of Concepts) of Real Time Location System (RTLS) from Asset Management Critical Environmental Monitoring of Temperature, RH, ACH applications for laboratories compounding pharmacies, Isolation Rooms, Auto Sensing Technologies, etc.,
8. This year, we launched Intelligent Healthcare Solutions- IoT (Internet of Things) platform from Smart/Intelligent Building Hospital, Facility Management Real-Time, Energy consumption monitoring, OPD queuing system, Intelligent Nursing Ward System, Computer on Wheels/Mobility solutions, Telehealth/Telemedicine, Interactive monitors, Infotainment etc.
