# EMR Unique Values

Offers best of breed clinical patient management solution with powerful customization and interoperability capability.

Is highly customized locally to meet specific requirements and expectations.

Covers hospitalization wards, care units, outpatient clinics and large set of specialties under one unified record.

Documents the patient clinical journey at the point of care and delivers true continuum of care. It improves the patient safety.

Standardizes medical processes, introduces affordable implementation projects and affordable Cost of Ownership.

Projects create unified & integrated medical record, leading the hospital toward HIMSS stage 6/7 standards.
